

XDNA

A Downer Company

**NAVIGATING
THE INTERSECTION
OF YOUR DATA FOR
SMARTER DECISIONS**

Are you struggling to make sense of your data or unsure how to unlock its full potential? With the right tools and guidance, your data can become a powerful asset to drive smarter decisions and fuel your success. Yet, fragmented data, a lack of data literacy, and missed opportunities for productivity gains may be holding you back.

At xDNA, we work with organisations like yours to turn these challenges into opportunities. Our data-driven solutions are designed to give you a competitive edge by improving reliability, boosting productivity, and enhancing safety across your operations. Let us help you fully harness the power of your data, so you can focus on growing your business.

Unlock the Potential of Your Data and AI Capabilities

Uncover Hidden Insights:

Identify and tap into your latent data to reveal opportunities and drive innovation.

Transform Your Business Processes:

Leverage data to streamline and revolutionize operations for greater efficiency.

Neuroverse:

Accelerate time to value through open, scalable platforms designed for rapid integration and insight.

Big Data, Smart Decisions:

Harness data-driven solutions to tackle large-scale challenges with precision.

Generative AI for Asset-Intensive Environments:

Optimise operations with cutting-edge AI tailored to industries reliant on complex assets.

Shaping Your Data Journey

Unlock Actionable Insights:

Discover and define the key insights that drive meaningful impact and fuel your business growth.

Faster Time to Value:

Spend less time managing platforms and more time seizing business opportunities with ready-to-use, best-practice solutions.

Data Governance Excellence:

Leverage advanced tools, methods, and ethical practices to ensure the integrity and sustainability of your data-driven solutions.

Tailored for Australian Critical Infrastructure:

Built, maintained, and supported by Australian professionals with security clearance, ensuring robust protection and compliance for vital operations.

Who We Empower

We deliver powerful industry solutions that unlock value for executives, asset owners, operators, and maintainers. By leveraging advanced analytics, simulation, and automation, we provide high-impact, data-driven insights that drive smarter decisions and greater efficiency across every level of your organisation.

Tailored Solutions for Your Industry

We understand that every industry is unique, which is why our solutions are specifically designed to meet your sector's individual needs. Whether you manage linear assets in transport and utilities or oversee fixed and mobile plant and equipment, our expertise ensures you get the right tools for the job. We also offer comprehensive support for facilities management, optimising the performance of your buildings, spaces, services, and assets. Whatever your focus, we're here to deliver solutions that work for you.

Our Rail Solution Accelerators

- × **Neuroverse Virtual Management Console (VMC)** for 360 degree insights on operations
- × **TrainDNA** for rolling stock
- × **TrackDNA** for rail and linear assets

xDNA VMC

Is the trusted solution for customers in rail manufacturing, rail operations, and facilities and asset services, helping them elevate their integrated operations. By delivering comprehensive, real-time insights across your enterprise, factory, and network, xDNA VMC empowers you to optimise the lifespan of your assets and components, ensuring maximum efficiency and reliability throughout your operations.

xDNA Supply Chain Solutions

are trusted by asset-intensive customers to unlock value in complex supply chains. From innovative procurement category insights to usage optimisation, our solutions leverage automation, data, and AI to drive efficiency and performance.

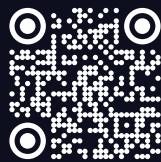

xDNA Maintenance Solutions

helps asset-intensive organisations unlock value by analysing vast amounts of work orders to uncover insights that were previously overlooked. Our customers rely on these solutions to pinpoint recurring faults, identify duplicate work orders, detect abnormal wear and tear, and share real-world field data with original equipment manufacturers. These insights lead to substantial improvements in asset performance, driving efficiency and reliability across your operations.
