

Our Point of Difference

- ✓ 130+ local employees
- ✓ 8 metropolitan and regional locations
- ✓ Customer and community focused
- ✓ Market-leading data and reporting system
- ✓ Drive towards sustainable operations

Road Maintenance & ITS

Who we are

Downer Maintenance & ITS is a leading provider in road network management and maintenance across Australia. In addition to South Australia, we provide services to clients across Queensland, New South Wales, Victoria, Tasmania, and Western Australia.

At Downer, we work collaboratively with our customers to understand their needs now and into the future.

We use data driven insights and market leading systems to provide outcomes that meet operational needs.

We build strong, trusted relationships by providing a consistent reliable service using our highly skilled and experienced team.

We prioritise the safety of our people and of all road users; and strive to deliver an exceptional customer and community experience.

What we do

Our core services include:

- Road Network Management and Maintenance of Sealed and Unsealed Roads
- Electrical, Mechanical, and Intelligent Transport Systems (ITS) Management
- Bridge Maintenance & Minor Civil Construction

Drawing on the full organisational capability of the wider Downer Group, Downer Maintenance & ITS offers an unparalleled and integrated service to our customers.

Our market-leading asset management systems have been independently certified to the highest standard. We were awarded the first ISO 55001 Asset Management certification for the management of a road network in Australia, setting a new benchmark in asset management. In addition to ISO 55001, Downer is externally accredited to national and international safety, environmental, and quality standards.

Our work helps to ensure **safe, reliable, and efficient** journeys for all road users.

Road Network Management & Maintenance

Backed by the national business, our highly capable and experienced local team deliver a range of road maintenance services to public and private sector clients, including:

Routine & periodic maintenance

- Routine pavement repairs
- Pavement patching & resurfacing
- Unsealed shoulder & road grading

Long-term strategic network planning

- Network condition and deterioration assessment
- Asset data collection

24/7 SA based Operational Support Centre

- Emergency response
- Spill clean up & make safe
- Traffic management

Vegetation & roadside maintenance

- Envelope clearing and weed management
- Graffiti removal
- Sweeping and litter collection
- Safety barrier and wire rope fence repairs
- Drain cleaning and repairs

Asset inspection services

- Routine maintenance inspections
- Pavement condition assessment
- Roadside asset condition reporting
- Comprehensive asset condition visualisation

Pavement Stabilisation & Recycling

Downer offers cost-effective and sustainable solutions for pavement stabilisation and recycling.

Our expert team works with customers through the process of investigation, inspection, and testing to determine the most advantageous design for their unique asset and budget requirements.

Our approach is underpinned by:

- ecologically-minded, industry-leading systems and innovation
- national research and development laboratory
- a fleet of specialised plant and equipment
- a commitment to safety, environment, and sustainability through industry-awarded Zero Harm programs

Our service can transform a previously unsuitable material into Australian-Standard compliant pavement by re-using existing pavement materials. This reduces construction time and lowers greenhouse gas emissions for our customers, providing them with a sustainable option for asset renewals.

Key Benefits

- ✓ Lower maintenance costs over the life of the pavement
- ✓ Reduced construction time
- ✓ Lower greenhouse gas emissions
- ✓ Improved permeability

Our Experience

- ✓ Over 150,000 assets managed
- ✓ 23+ years servicing SA
- ✓ More than 8,500km road maintained
- ✓ Private sector and government customers

Electrical & Intelligent Transport Systems

Downer delivers market-leading services in electrical and Intelligent Transport Systems (ITS) management, maintenance and capital works, including:

- Routine & cyclical maintenance
- 24/7 emergency response & accident repairs
- Asset data collection & reporting
- Install & commission of new assets
- Long-term strategic network planning

We have the capability to service a range of assets including:

- Traffic signals
- Electronic signage
- Street lighting
- Closed Circuit Television (CCTV)
- Variable speed signs
- Loop detectors
- Actuated crossings

Our uniquely skilled team has a track record identifying innovative solutions to meet our customers' needs.

Bridge Maintenance & Minor Civil Construction

Downer has a highly capable civil team delivering periodic bridge maintenance and minor capital works including:

- Kerbing
- Bicycle & pedestrian crossings
- Footpaths
- Conduit installation
- Spalling & crack repairs
- Bridge joint replacement
