

# Water

Leading provider of complete water lifecycle solutions.

# About us

**Decades of experience. Size and scale to deliver for our customers.**

Downer is the largest provider of outsourced water services in Australia and New Zealand.

Our services span the full asset lifecycle including:

- Water, Wastewater & Recycled Water Treatment
- Water & Wastewater Networks
- Pipeline Technology
- Smart Metering
- End-to-End Water Infrastructure Services
- Design, Build, Operate & Maintain

Downer is proud to continue playing a major part in delivering vital water services that connect communities in urban and regional areas - now and into the future.

**27** membrane bioreactors delivered since 2004.

Water and wastewater services for  
**14 million** people across AU and NZ

**Australia's 1st** Biosolids gasification facility

**80+** treatment plants designed and constructed in the last 35 years.

**80,000km** water pipelines serviced across AU and NZ

## Our major contracts in AU:

### Greater Western Water, VIC

Downer is a long-term delivery partner to Greater Western Water (GWW), providing construction services for the utility's water and sewer asset renewal program across Melbourne's CBD, western and north western regions.

The program focuses on the systematic replacement and rehabilitation of ageing pipes to improve network reliability, reduce failures and leakage, and maintain service levels for a rapidly growing customer base.

Delivered as a programmatic model rather than individual projects, Downer works alongside GWW to plan and execute renewals in live urban environments, with strong emphasis on safety, community impact minimisation, traffic management, and asset reinstatement.

### South East Water, VIC

Downer is an industry partner to South East Water delivering the Water and Sewer Civil Maintenance Services Program across Melbourne's south eastern region and Mornington Peninsula.

The program covers planned and reactive maintenance of water and sewer networks, including water mains, sewer mains, and sewer cleaning activities. Downer supports South East Water in maintaining safe, reliable, and compliant services for a rapidly growing customer base.

The program operates as a 24/7 operational maintenance model, with strong emphasis on emergency response, safety, environmental compliance, and minimising customer and community impacts in live urban networks.

### Melbourne Water, VIC

Downer is a long term delivery partner to Melbourne Water under its Major Capital Delivery Framework, participating through the Safety Focused Performance Joint Venture (SFPJV). The framework was designed to deliver complex capital works and renewals across Melbourne Water's water and sewerage assets over a 10-year program.

Through this collaborative delivery model, Downer contributes integrated design, construction, commissioning, and rehabilitation services for treatment plants, pipelines, and network assets, with a strong emphasis on safety, value for money, innovation, and social procurement.

### Unitywater, QLD

Partnering with Unitywater to deliver Build Better Together (BBT), a long-term, collaborative capital delivery model designed to deliver major water and wastewater infrastructure across South East Queensland.

Program and construction management under a collaborative model to deliver capital works across water, sewerage and recycled water networks, upgrades and renewals at 17 wastewater treatment plants, network growth works in the Sunshine Coast, Moreton Bay and Noosa regions.

### Urban Utilities, QLD

Downer has provided water and wastewater services for Urban Utilities since 2018.

A new 10-year contract was awarded in 2025 to support the delivery of capital works for water, wastewater and water treatment assets across Urban Utilities' network, covering the Brisbane, Ipswich, Lockyer Valley, Scenic Rim, and Somerset local council regions.

Through NG4D, Downer provides end-to-end development, construction, and commissioning services for water, wastewater, network and treatment assets, supporting growth, resilience, affordability, and climate ready infrastructure for more than 1.6 million customers across the region.

The full scope of work includes project management and development, engineering, construction and commissioning of water, wastewater and water treatment assets.

### Logan Water, QLD

Downer has proudly been part of the Logan Water Partnership since 2009. The program has delivered new and improved water, wastewater and recycled water infrastructure throughout the City of Logan, including network planning, engineering design, environment approvals and program management.

In 2020, Downer collaborated with Logan Water, WSP and Pyrocal to design and construct Australia's first biosolids gasification facility at the Loganholme WWTP.

The alliance also delivered Queensland's first environmentally sustainable Wastewater Treatment Plant (WWTP) along with the enriched natural surroundings that is officially named the Cedar Grove Environmental Centre.

### Gold Coast City Council, QLD

Downer is a joint delivery partner to the City of Gold Coast through Gold Coast Infrastructure Solutions (GCISolutions), established to deliver the City's Asset Lifecycle Delivery Services (ALDS) for water and wastewater infrastructure.

Commencing in August 2022 under a 10-year collaborative framework, GCIS provides end-to-end asset lifecycle services, including planned and reactive maintenance, renewals, refurbishment, and capital works across the City of Gold Coast's water and sewerage networks.

The program supports reliable service delivery for Australia's second largest local government area and is underpinned by a partnership style model focused on safety, local industry participation, innovation, and long term network resilience.

### Sydney Water, NSW

Confluence Water is a joint venture between Downer, Ventia and Jacobs, serving as Sydney Water's Northern Region Delivery Partner.

Confluence Water currently delivers design, construction and maintenance facilities management services in

Sydney Water's North region, which stretches from Sydney Harbour to the Hawkesbury River and includes the Hills Shire.

It is also responsible for the maintenance, renewal and upgrade of existing assets in the region, as well as the construction of new assets, such as pipelines, pump stations and wastewater treatment plants.

In 2026 Downer completed a major upgrade to Sydney Water's West Camden Water Recycling Facility, doubling wastewater treatment capacity.

Delivered by a joint venture between Downer and BMD Group, in partnership with Sydney Water, the new facility can now treat up to 1,500 litres per second of influent, protecting the Nepean River by reducing nutrient loads and strengthening the long-term health of the local ecosystem.

Our PipeTech team has been partnering with Sydney Water for more than a decade, delivering reactive sewer maintenance across the entire Sydney Water network.

The scope covers dig and repair excavations, robotic grinding, and localised internal patch lining. PipeTech's crews will be on-call to ensure faults are addressed quickly and safely to keep essential services running.

# Trusted leader in meter provisioning, data capture and information insights.

**Downer's metering business Skilltech offers utilities and councils innovative data capture and metering field services, partnering with industry leaders to provide end to end solutions.**

## **We deliver:**

- Meter Reading
- Embedded services
- Digital metering field services
- Meter supply and installation
- Logistics and Warehousing
- Disconnections/Reconnections/Restrictions

## Deliver What Matters for South East Queensland

At Downer, we don't just build and maintain infrastructure – we deliver essential water services that Queenslanders rely upon.

From the Sunshine Coast to the Gold Coast, South East Queensland is a region on the move.

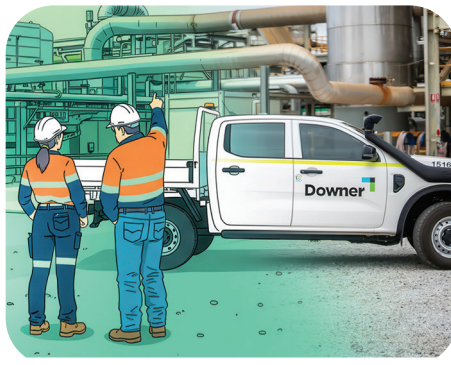

Downer is ever present in the community delivering the essential water and wastewater services that keeps Queensland connected, resilient and ready for growth.

To help us deliver on our commitments, we're currently recruiting for people of all backgrounds - whether you bring industry experience, technical know-how or transferrable skills from other sectors.

We're growing. We're strengthening. And we're inviting you to be part of it.

**Make It Matter**

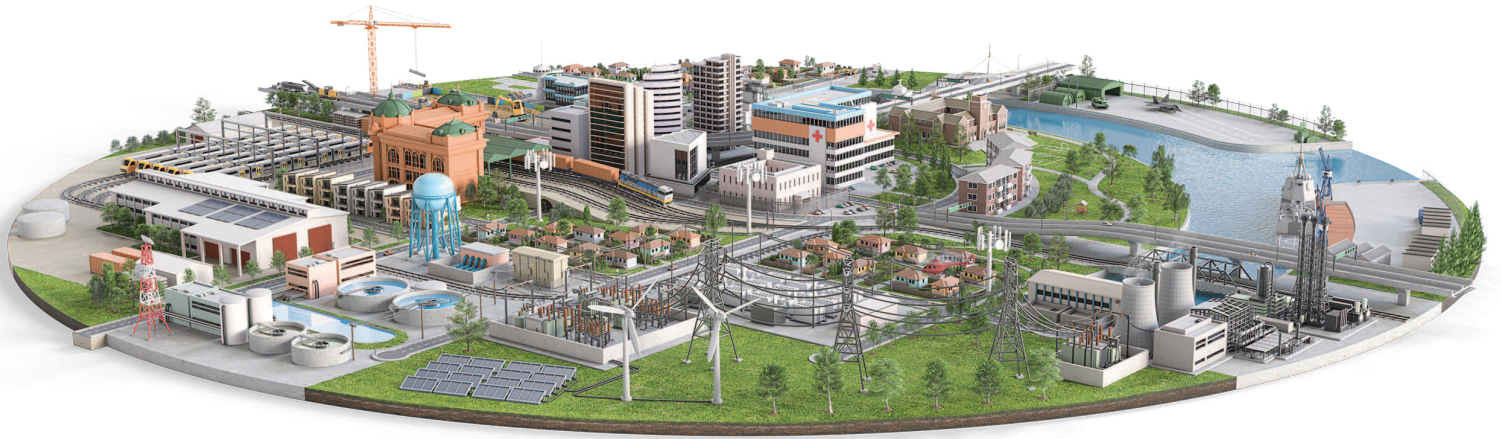

**Make Your Mark**

**Make Us Stronger**

We're not just filling roles. We're securing the future capability of our workforce to ensure Downer continues to deliver for our customers and communities. Ready to apply?
