

NT Asphalt Services

Local Capability. National Expertise.

For more than 35 years, Downer has delivered high-quality surfacing and maintenance services across the Northern Territory, supporting critical infrastructure with reliable, sustainable and innovative transport solutions.

With a long-standing presence in the Northern Territory, Downer delivers road construction, rehabilitation, surfacing and maintenance services across metropolitan, regional and remote communities, safely delivering quality outcomes for government and private sector customers.

Major Projects Delivered:

Our NT operations have played a key role in the successful delivery of significant infrastructure projects, including:

- Resurfacing works at Alice Springs and Yulara Airports
- Upgrade works for Hidden Valley Raceway in preparation for the V8 Supercars
- Tiger Brennan Drive duplication
- Surfacing works for the INPEX gas project transport.

Our Approach:

We form partnerships with our customers to demonstrate new products and services, such as high recycled content in bituminous and asphalt products, and provide expert advice informed by our in-house research, development and asset management capabilities. Using modern paving and compaction equipment to achieve high-quality, durable pavement outcomes.

NT Asphalt Production Capability

Local Capability. National Expertise.

Downer is one of Australia's largest asphalt suppliers, delivering asphalt production, paving and pavement maintenance services across the Northern Territory for government, airport, defence, mining, industrial and commercial customers.

Downer operates a fully equipped asphalt production facility in Darwin. This supports a wide range of infrastructure projects throughout the Darwin metropolitan area and surrounding regions.

Our Armann Asphalt Plant Specifications

- Fully electronically controlled operation systems
- 55 – 140 Tonne Per Hour mix capability, depending on material moisture content and product demand
- Six 3 X 7 m³ Material Cold Feed Hoppers & Two 32 Tonne Lime and Filler Dust Silos.
- Two Bitumen Storage tanks & Automated heating system. Tank agitators for Polymer Modified Binders.
- 30,000ltr self-bunded Diesel storage.

Customer-focused asphalt solutions

A single provider for asphalt production, paving and pavement maintenance.

Access to national technical expertise, research and development through national Laboratory.

Flexibility to produce customers' desired products on an as-needs basis in small or large batch quantities.

Superior consistency of manufacturing and production road infrastructure contractors.

Strong safety, quality and operational systems supported by one of Australia's largest.

Recycled Asphalt Pavement capability, reducing the need for virgin quarry materials, bitumen, or poly-binders.
